

## SAVE OUR GLACIERS

GLACIERS ARE VITAL TO THE WATER CYCLE

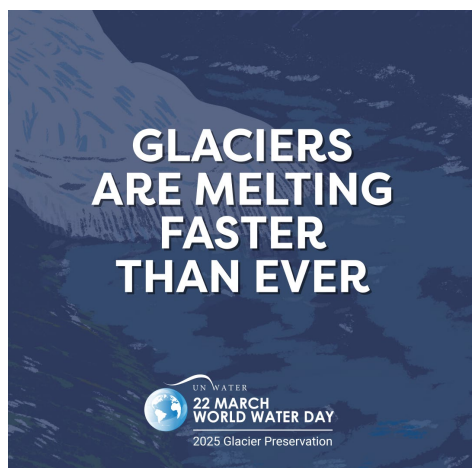

### World Water Day social media messages.

**Glaciers are melting faster than ever.**

As the planet gets hotter due to climate change, our frozen world is shrinking, making the water cycle more unpredictable and extreme.

**Glacial retreat threatens devastation.**

For billions of people, meltwater flows are changing, causing floods, droughts, landslides and sea level rise, and damaging ecosystems.

#WorldWaterDay [www.worldwaterday.org](http://www.worldwaterday.org)

**Glacier preservation is a survival strategy.**

We must work together to reduce greenhouse gas emissions and manage meltwater more sustainably for people and the planet.
